

Cloud Assessment - Manufacturing Industry

Establishing cloud strategy and roadmap using DT assessment

Using cloud assessment, we checked the cloud application/utilization level for the business and technology fields. And we analyzed the assessment results to establish cloud strategy for the infrastructure, then established the cloud implement roadmap and action plan.

Blue Print for DT(Cloud based)

Data-driven Biz Innovation	R&D Support	Smart work Environment	Business Continuity
<ul style="list-style-type: none"> · Increase network bandwidth · Secure large cloud storage 	<ul style="list-style-type: none"> · Improve R&D portal for cooperation · Utilize customized cloud resources 	<ul style="list-style-type: none"> · Flexible smart work environment · Integrated SW management · Enhance Security 	<ul style="list-style-type: none"> · Cloud Scalability & Elasticity when and wherever required · Extend DR System based on SDDC

Business Expectations	<ul style="list-style-type: none"> · Design R&D supporting infrastructure concept model to enhance manufacturing capability · Build high-scalable and high-use IT platform based on cloud technology · Integrated management of cloud resources by establishing governance
