# DevOps Consulting

We provide DevOps consulting, covering the full life cycle of software development – cloud-based development environment setup, testing, deployment, and operation. We also provide a DevOps tool chain.

## DevOps Process

| Request Mgmt. | Collaboration | Dashboard |
|---|---|---|
| Manage planning and development tasks | Register best practices and project templates | Update development progress and quality status |

Plan · Code · Build · Test · Release · Deploy · Monitor · Operate

## Development Environment Setup

### Development Templates

Templates

Java · Python · …

Auto generation →

### Development Environment

Develop codes ▶ Review codes and security vulnerability ▶ Automate tests ▶ Deploy

**Private Cloud**
Container | Bare Metal

**Public Cloud**
Container | VM

---

## ✔ DevOps Process

Establish development/operation processes and ways of collaboration, support tool design for process automation, and provide consulting on the full software life cycle.

## ✔ Development Environment Setup

Set up a self-service development environment, reduce lead time by automating development & deployment, and ensure manual error prevention, easy modification and rollback.
