

Operation Automation Consulting SRE

We take a site reliability engineering (SRE) approach to help improve operation quality and reliability through automation and early detection/response to disruptions.

* SRE : Site Reliability Engineering

* OKR: Objective Key Result

* AIOps : Artificial Intelligence for IT Operations

* ChatOps : a way to automate most operations-related tasks with a chatbot

✓ Standardization

Enhance operation quality and help ensure a close collaboration among HQ, GDC and other relevant teams.

✓ Automation

Automate operations (regular tasks, releases) and disruption handling processes (detection, repair, etc.)

✓ Visibility

Identify and address operational risks early on with OKR-based real-time quantitative performance measures.
