

Training Program for Postgraduates

Samsung SDS has established a recruitment plan in relation to global market trends and the company's mid- to long-term strategies. In particular, we identify necessary human resources in advance and form a pool of necessary human resources so that there is no difficulty in supplying excellent human resources due to sudden market fluctuations. In addition, we are training excellent human resources necessary for recruitment in cooperation with leading universities in Korea.

[Postgraduates' Training Program Process]

Currently, Samsung SDS selects AI as one of the areas that needs to be nurtured for next-generations, and has been promoting cooperation with KAIST, Korea University, Myongji University and Seoul National University to proactively secure excellent human resources.

[The Details of Postgraduates' Training Program]
