

Samsung SDS License Policy for Brity RPA v2.5

Revision Date: 2022-July-28

1. Basic Information

Product Name	Brity RPA v2.5
Description / Features	AI-based RPA (Robotic Process Automation) Software
System Requirements (Minimum Recommended)	- Orchestrator: - DBMS: MariaDB 10.3.10 / MySQL 8.13 - OS: Ubuntu 16.04.1 LTS / CentOS Linux 8 / RHEL 7.4 - JAVA: 1.8 - WAS: Apache Tomcat/9.0.43 - ActiveMQ: apache-activemq-5.15.14
	- Designer / Bot: - Windows 10 (64-bit) .NET Framework 4.6.2 - Chrome 41

2. Sales Item

Sales Item	Description
Orchestrator	Web-based integrated management environment that schedules, monitors, and controls multiple bots reliably
Bot	- Software program to run the automated processes composed in Designer - Operates with server connection but can run on the attended mode if needed
Attended Bot	- Software program to run the automated processes composed in Designer - Independent use on local/virtual desktops without server connection
Designer	Software program to design flow charts and test the designed automation processes
Designer Lite	- Software program to design flow charts and test the designed automation processes - Lightweight Designer with limited features
Stand-alone Designer	- Software program to design flow charts and test the designed automation processes - Independent use on local/virtual desktops without server connection
Stand-alone Designer Lite	- Software program to design flow charts and test the designed automation processes - Lightweight Designer with limited features - Independent use on local/virtual desktops without server connection

3. License Type

3.1. Implementation Type

Sales Item	On-Premises	SaaS	Other
Orchestrator	Yes	Yes	No
Bot	Yes	Yes	No
Attended Bot	Yes	No	No
Designer	Yes	Yes	No
Designer Lite	Yes	Yes	No
Stand-alone Designer	Yes	No	No
Stand-alone Designer Lite	Yes	No	No

3.2. Term of License

Sales Item	Perpetual ¹	Fixed Term ²	Subscription ³	Other
Orchestrator	Yes	Yes	Yes	No
Bot	Yes	Yes	Yes	No
Attended Bot	Yes	Yes	No	No
Designer	Yes	Yes	Yes	No
Designer Lite	Yes	Yes	Yes	No
Stand-alone Designer	Yes	Yes	No	No
Stand-alone Designer Lite	Yes	Yes	No	No

¹ Perpetual – license to use indefinitely (applicable to on-premises software)

² Fixed Term – license to use for a fixed period of time (applicable to on-premises software); basic license will be for a year and upon expiry, it can be renewed or extended.

³ Subscription – license to use for a regular interval of time subscribed with a fee charged based on the usage (fixed amount of time) (applicable to cloud-based software, SaaS); a fixed fee will be charged on a monthly basis and the term of the license can be for a certain number of months or years as needed.

3.3. Basis of License

Sales Item	Basis of License	Content
Orchestrator	Server	Based on the number of physical or virtualized servers (based on OS) where the product is installed → applicable to on-premises license
	Tenant	Based on the number of separated DB schema of Orchestrator on SDS cloud → applicable to SaaS license
Designer	Named Device	Based on the number of physical or virtualized desktops (based on OS) where the product is installed
Bot	Named Device	Based on the number of physical or virtualized desktops (based on OS) where the product is installed
Attended Bot	Named Device	Based on the number of physical or virtualized desktops (based on OS) where the product is installed
Stand-alone Designer	Named Device	Based on the number of physical or virtualized desktops (based on OS) where the product is installed

4. Open Source Software License Notice

Sales Item	Manual	Application / Solution
Orchestrator	Yes ¹	No

Designer	No	Yes ²
Bot	No	Yes ³
Attended Bot	No	Yes ³
Stand-alone Designer	No	Yes ²

¹ The open source software license notice can be found in the online manual available at the website URL address: https://www.samsungsdsbiz.com/help/BrityRPA_ENG by following in the folder path in the top menu panel on the website as follows: > Admin Manual (Orchestrator) > Brity RPA Admin Manual (version no.) > 8. Open Source.

² The open source software license notice can be found in the application by going to the following menu: Brity RPA Designer > Menu > Help > Open Source License.

³ The open source software license notice can be found in the application by going to the following menu: Brity RPA Bot > About > Open Source License Information.

5. Other Terms

- 5.1. The license key will be issued to those who purchased a valid license for the product supplied as on-premises software.
- 5.2. In case a new license key is needed due to the change in the hardware or the loss of a previous license key, the request should be made to the appropriate salesperson in charge of the product. (NB: SDS will assume no legal responsibility or whatsoever for any loss of or damage to the license key and will not be required to issue any new license key or make any replacement thereof unless the request has been made by the person holding an authorized valid license.)
- 5.3. Any person making an unauthorized copy, distribution, or use (other than for its intended/permitted use) of the key code may be subject to liability in accordance with applicable law.
- 5.4. Any inquiries for the license for the trial version should be directed to, in the case of SaaS, Online My Trial Service (available at <https://mytrial.samsungsdbs.com>), or in the case of on-premises software, appropriate salesperson in charge of that product.
- 5.5. The terms set forth here apply to the above software product release version only. Any modification or amendment to the terms herein as may be needed due to the changes to or updates in the product will be published in due course and made available on the website of Samsung SDS.
