FabriX

 Samsung Cloud Platform

AI Service Designed to Boost Corporate Productivity and Value Creation

FabriX is an AI platform service that utilizes corporate-specific generative AI models to harness various in-house knowledge information and seamlessly integrate with business systems. This enriches user experience and facilitates the easy use of AI across multiple corporate systems.

Creating Corporate Value

By offering bespoke AI models for businesses, we enhance work efficiency and provide an environment where employees can freely create and utilize AI. This enables companies to innovate their business processes, increase productivity, and create corporate value.

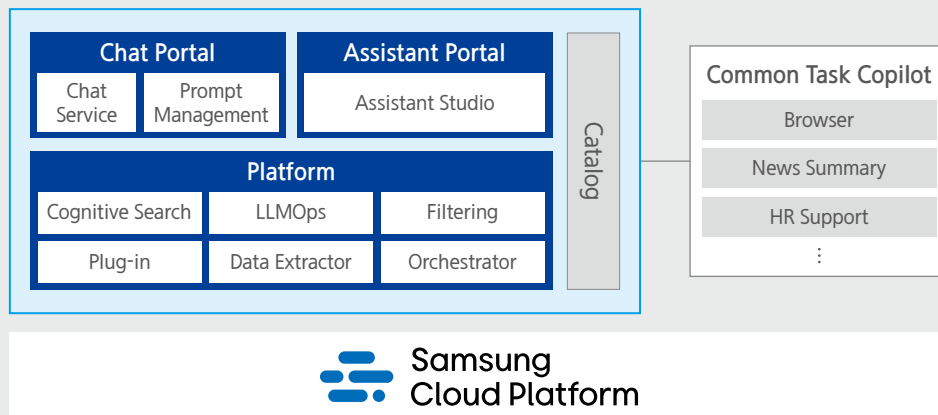

Easy Create and Utilize AI

The assistant studio enables any corporate member to enrich the user experience by creating and sharing AI tailored to their purposes using their own assets, thus facilitating a culture of shared innovation and utilization within the enterprise.

High Scalability

With the FabriX platform, we offer a copilot service that allows the experience of AI from anywhere within the company's systems, ensuring a seamless and scalable integration of AI technology throughout the organizational infrastructure.

Service Architecture

Key Features

- **Chat Portal**
 - Provides user-centric conversation services based on LLM(Large Language Models)
 - Prompt studio : Offers prompt simulation and template creation
 - Prompt library : Provides an environment for sharing and utilizing prompts
