

SAMSUNG SDS

EMM

for Wearables

Go-to Solution for Maximizing the Productivity of Your Wearables

Samsung SDS EMM for Wearable, integrated management solution for wearable devices, is the world's first solution that allows administrators to remotely service employee devices while minimizing the workloads.

Manage Device Effectively

Deploy and manage apps remotely without pairing with smartphones as well as support force enabling/disabling of features

Secure Enterprise Data

Protect against unauthorized access by activating screenlock remotely as well as prevent data leaks through remote factory reset in case device is lost

Extend Battery Life

Save 30% of battery life by disabling functions causing battery drainage (GPS, NFC, Bluetooth, Wi-Fi, etc.)
