

SAMSUNG SDS
Nexoffice

Enterprise growth starts with smart collaboration.

In a fast changing environment, the continued growth of the company is determined by its working ways.

The key to success is enhanced productivity in today's ever-more complex and diverse collaborative workplace.

Transform your way of working.

Start now with the Nexoffice collaboration solution.

The Nexoffice Solution is based on solid technology and expertise to provide a secure environment for the success of your collaboration.

A group of four diverse office workers are gathered around a long wooden table in a bright, modern office. They are all smiling and looking at a laptop screen. One man is pointing at the screen, while others look on attentively. The office has large windows in the background, letting in natural light. The overall atmosphere is collaborative and professional.

SAMSUNG SDS Nexoffice

Nexoffice is a collaboration solution provided as a suite with a collection of essential collaboration tools, such as mail, approvals, PIMS, messenger, video chat and file share for the enterprise environment with enhanced security.

With Nexoffice, experience the optimal collaboration workspace anywhere, anytime.

Collaborate seamlessly and efficiently on one platform

The features and the usability of Nexoffice have been optimized so you can seamlessly use various collaboration tools from different devices.

Use the internal and external systems integrated with the solution built on a secure environment and experience enhanced productivity.

**SAMSUNG SDS
Nexoffice**

Collaboration hub

Nexoffice provides key features like Mail, Messenger, Meeting, and EFSS as a suite based on the stable technology and operational know-how of Samsung. With Nexoffice you can achieve the highest level of collaboration efficiency.

Security

Environment for preventing external threats, such as spam, malware, and viruses is provided. Data is protected through features, such as fine grained user permission management, secret chat, and screen capture prevention.

Integration

Integration is easy with internal systems like Nexoffice, ERP, and PLM and external systems like Salesforce.

Key Functions

All-in-one collaboration solution Nexoffice Mail, Messenger

Mail

Various features are provided, such as large file attachments, automatic classification of received mail, and integrated search.

Messenger

Share text, audio, video, and screens instantly for real-time collaboration. Also you can easily search the employees and check their status

PIMS

Easily register and check schedules.

System integration

Integration to the internal systems and the external SaaS solutions is provided based on SAML-based SSO and open API.

Fully immersive conferencing Nexoffice Meeting

Unified Conferencing

Web conferences, video conferences, and audio conferences are provided together so the conference type optimal for the participant's situation can be selected.

Document and screen sharing

Share documents and screens from PC or mobile. Comments can be left using the annotation tool.

Remote control

Change authority during screen sharing to allow other participants to control the screen remotely.

Enterprise file sync and share Nexoffice EFSS

Workspace

A virtual work environment for collaboration where members can make posts and drives to share files and edit it together.

Drive

EFSS provides a drive where files can be shared and managed in department and work units. Access to the driver is possible via Windows File Explorer.

Stream

Like an SNS service, materials and posts that have been created or edited according to the workflow can be viewed in the timeline.

Real-time editing

Save time by working on a document saved in the drive at the same time. Work together in real-time using Pad without the need to collect individual edits.

* EFSS : Enterprise File Sync & Share

Discover intelligent ways to collaborate with Nexoffice

Cost reduction

Collaboration tools that are essential for work are provided in a software suite, making it more affordable than introducing individual tools. Integration with existing internal and external systems is possible for a reduction in development costs.

Advanced security and compliance

A worry-free environment is provided in terms of security to reduce enterprise risks. Customize security features for your enterprise needs.

Maximum productivity

Fast and precise collaboration is supported anywhere, anytime. Improve your team collaboration and maximize productivity.

Use Cases

Unleash the potentials of Nexoffice

Connected team for real-time collaboration

When you need to work together urgently on a customer proposal as an example, you can communicate instantly with your colleagues via text messaging, voice, and video, and simultaneously edit documents in EFSS to quickly produce the final outcome.

Smart work with system integration

When conducting work, such as making an order, billing, or providing customer service, individual system login is not required because SSO is supported. Also the current progress can be shared through mail and messenger so you can focus on more important work without wasting time

Secure file sharing and real-time co-editing

With EFSS, you can work on a document together and complete it efficiently. Use the document share feature in Meeting or Messenger to co-edit a document in real time.
