

SAMSUNG SDS Nexoffice Meeting

The Future of Collaboration in office

With the expansion of the global market and the diversification of business methods, many companies are considering effective collaboration method between employees at remote sites and those with various work styles.

As the collaboration of various conditions such as urgent meeting between the overseas site and the head office is required, or when a document is needed to communicate in the absence of a conference room, and a remote seminar is required for a large number of business sites, New communication methods that cover all the collaborative environments are needed.

It's time to change the way of meeting

Timely information-sharing and decision-making have become an essential for the survival and success of enterprises in today's rapidly-changing business environment.

So now is the high time for a paradigm shift in corporate communications.

Face-to-face meetings expedite workflows

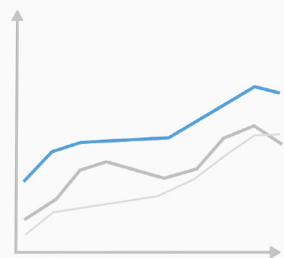

Nexoffice Meeting is a unified conferencing solution that provides video/web/audio conference services, enabling real-time communication and collaboration anytime, anywhere via a wide range of devices including PC, mobile and video conferencing room.

Data usage >

Used amounts >

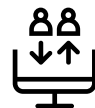

Enhanced Accessibility

Join the meeting using groupware, messenger or multiple devices.

With Nexoffice Meeting, you can start your meeting in multiple ways : Using your groupware system (ex. E-mail, contacts, calendar) and even your mobile messenger.

Also, all participants can join the meeting with their own devices including PC, mobile and other video conferencing equipment.

Clear Communication

With various meeting mode and functions, participants can concentrate better on the their conferences.

You can choose document mode or video mode depending on the purpose of a meeting including training or interviews and utilize multiple functions including pen tools for annotation, PC screen sharing for co-editing and whiteboards.

Effective Management

Manage meeting history and contents with powerful admin functions.

By using the Virtual Meeting Room(VMR) function, the meeting room can be saved so that it does not disappear after the meeting is ended. In the review mode, the user can reconnect to the meeting room which is ended within one month and you can check and re-use all the materials you were sharing during the meeting.

Key Functions

Connect with anyone on any device

simultaneously regardless of
your location strengthens your
competitiveness while reducing
time and cost.**

Improved Communication between HQ and Branches

In the past, many companies had a slow and inefficient decision-making process that was constraining their ability to respond to issues promptly.

With Nexoffice Meeting, our customers can optimize their overall decision making process among multiple branches.

Also, Top leadership could communicate directly with branches so that all regional employees were able to deliver work information in a more timely manner to the right person.

Reduced Travel Costs, Quicker Rollout

Whenever our customer needed to give training to their employees, they used to dispatch their managers to execute the offline training course to employees throughout regional branches.

By adopting Nexoffice Meeting, they can minimize the time away from office and travel costs, thereby allowing manager to focus on his or her main role.

Use Cases

Unleash the potentials of Nexoffice Meeting
