

SAMSUNG SDS Nexoffice EFSS

for easier and safer file sharing and collaboration

Amorepacific's use case of introducing file management and collaboration solution for global business operation

Nexoffice EFSS went beyond being a simple file-sharing solution and truly transformed the way our employees work together, empowering them to work in a smarter way.

CIO of Amorepacific ”

Amorepacific is the largest cosmetics manufacturer in Korea with more than 5,000 employees—approximately 4,000 in Korea and 1,000 in global branch offices—working and collaborating across continents.

Along with recent changes in business environment, Amorepacific's growing global business have increased the number of stores, branch offices, sales channels and production sites, ushering the company to seek new and smart ways for cross-functional collaboration.

In addition, with the enforcement of a new labor regulation in Korea limiting maximum weekly work hours at 52, Amorepacific needed to create a work environment (i.e. mobile apps, cloud storage, etc.) where employees can access documents and work together seamlessly anywhere at anytime outside designated office workspaces.

In addition, Amorepacific's growing business has diversified and expanded collaboration channels, requiring an integrated platform to communicate and manage scattered documents and files easily in one place.

Accordingly, Amorepacific decided to provide a safer and more efficient collaboration workspace for employees, by introducing Nexoffice EFSS (Enterprise File Sync and Share).

- **Workspace (internal use)**
Dedicated workspace for each team or task
- **Workspace (third-party access)**
Shared workspace for collaboration with partner/vendors
- **Stream**
Discussion forums/boards for workspace members
- **Drive**
Cloud-based file storage/sharing
- **Search**
Powerful search engines for large scale queries

Amorepacific integrated various IT solutions that were used by over 5,000 employees and partner companies in 17 countries worldwide, and brought them together under one single platform, Nexoffice EFSS. Nexoffice EFSS enabled Amorepacific employees and partners communicate ideas on their mobile or PC in a faster and more efficient manner, using various features such as posts, memo pads, and to-do lists.

In addition, diverse security policies (i.e. file-specific custom security settings, file security approval, etc.) were applied in order to protect internal documents and data safely, allowing a more convenient and secure communication with appx. 1,000 partner company staff.

Solution Details :

Samsung SDS Nexoffice EFSS is a file sharing and collaboration solution that allows users to work together and manage documents easily and securely in one place.

Users can edit, modify, or share documents freely and communicate using various features such as memo pad or posts on a centralized cloud storage.
