

Caidentia

for Your Core Business Process

AI-Powered Item Quotation Analysis

Caidentia empowers organizations to optimize their procurement and sourcing processes, delivering AI-driven insights across design, sourcing, and procurement. Caidentia enhances operational efficiency, ensures flawless execution, and drives significant cost savings. With our patented AI capabilities, businesses gain a competitive edge by streamlining their design-to-pay workflows and improving decision-making throughout the procurement lifecycle.

Core Capabilities

Automated Comparative Analysis

Efficiently validates supplier quotations by comparing them against standard price databases and market prices, providing proactive assessments of quotation adequacy.

Line-by-Line Optimization

Breaks down complex quotations into individual line items for detailed validation, ensuring accurate review of pricing.

Continuous Standard Database Updates

Enhances accuracy by updating the standard unit price database with accumulated data from previous quotations, ensuring up-to-date reference points.

Key Benefits

**Better
Decision-Making**

Provides comprehensive, all-in-one information to help procurement teams select the most suitable supplier.

**Prevent
Overpricing**

Proactively assesses the adequacy of quotations to avoid overpaying, ensuring cost-effective supplier contracts.

**Improved
Quote Review
Efficiency**

Simplifies the review of complex quotations with hundreds of lines, allowing quick and accurate validation with a single click.
