SAMSUNG SDS

E-FOTA
with Samsung SDS **EMM**
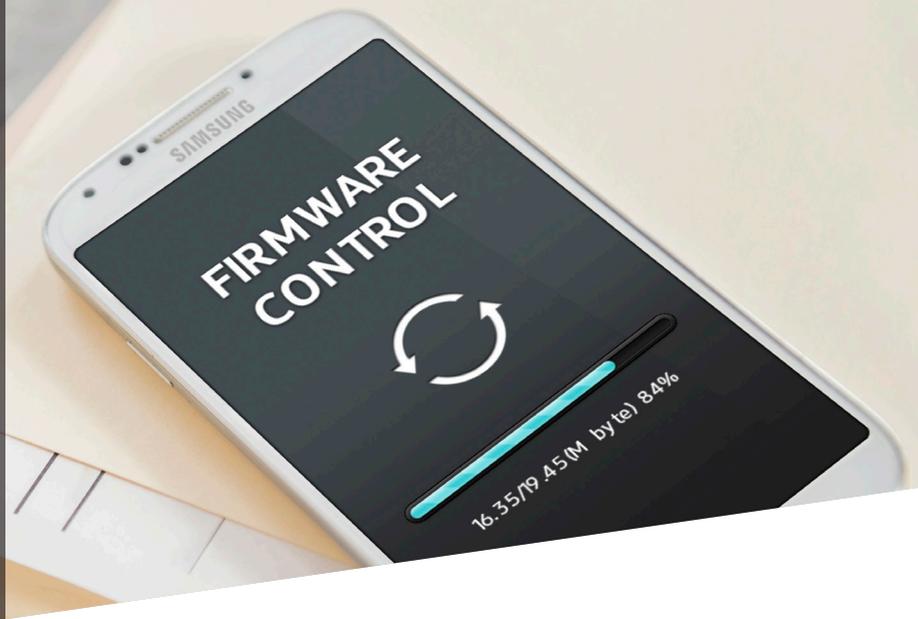

Keep Your Devices Stable and Secure by Managing Firmware Over the Air

The stability of a business app is essential to enterprise mobility environment. E-FOTA with Samsung SDS EMM allows mobile devices to be used in a more stable status than ever by enhancing firmware control and selective updates over the multiple devices.

Stability

Select and deploy the specific firmware compatible with your biz app for enhanced stability in daily business operations

Manageability

Enforce firmware update to the latest version to protect your devices from potential security threats in unstable firmware

Security

Schedule a firmware update in advance with EMM Admin Console to avoid interruptions during working hours
