Nexsign
for Enterprise

Simple and Secure Authentication for Enterprise Systems with ISAM

Samsung SDS Nexsign for Enterprise provides easy and secure access for system administrators and enterprise system users by enabling passwordless login using biometric authentication and a fingerprint scanner enabled mouse. Users no longer need to remember complicated passwords under Single Sign-on(SSO) function which manages multiple applications and systems.

Simplify Authentication

Login without password and control PC remotely with mobile devices

Provide simple authentication using various biometrics

Secure Enterprise Security

Protect confidential information via face recognition

Securely authenticate users with our PKI-based biometric solution

Enhance Work Efficiency

Minimize time-consuming authentication process

Help users easily access multiple apps and enterprise systems with our Single Sign-on(SSO) function
