

SAMSUNG SDS

# Remote Management Solution™

## Easy and Efficient Remote Monitoring & Management using IoT Platforms

Samsung SDS RMS provides remote monitoring, predictive maintenance and firmware management to maximize efficient operations of your IoT assets.

### Improve Management Efficiency

Remotely monitor status and diagnosis of your IoT devices

Deliver connectivity through SDK and an Open API as well as configuration setting for device events and alarms

### Maximize Asset Value

Minimize downtime through status monitoring in real-time and anomaly detection

Improve asset availability through predictive maintenance

### Reduce Maintenance Costs

Reduce operating costs through a remote incident monitoring and rapid resolution

Minimize maintenance costs through early prediction of failure and preventive management
