

SAMSUNG SECURE MOBILITY SUITE FOR GOVERNMENT

BE READY FOR YOUR NEXT MISSION

with our Mission Bundle for Sensitive Environments

Samsung Knox hardened mobile device. Defense-grade security. Offline environment support. Bundled together and ready to deploy.

Solve tactical mobility and data security concerns with our simplified, turnkey Samsung solution. Designed to meet the needs of government agencies, Mission bundle is the first and only Commercial Solutions for Classified (CSfC) offering that pairs a Common Criteria-certified mobile device with comprehensive mobile device management, architecture, and installation services.

SECURE CUSTOMIZABLE SUPPORT

Equip tactical teams and high-security employees quickly and cost-effectively with a Samsung Galaxy series device—National Information Assurance (NIAP) Common Criteria-certified and -validated for use in classified environments

Maintain security in a completely offline environment. Both Samsung SDS EMM and Samsung Knox architecture operate in an offline environment for highly secure deployments.

Safeguard sensitive data with robust encryption and remote device management provided by Samsung SDS Enterprise Mobility Management (EMM), a NIAP Common Criteria certified solution.

For added security and functionality, modifications to a device's commercial ROM can be made through the Samsung Knox Customization Binary Service.

SAMSUNG SDS AMERICA

SAMSUNG

As cyber-attacks increase, Samsung SDS America stands ready to support your agency's mission with the best mobile device management and strongest accredited security on the market.

IMPLEMENTATION SUPPORT

- Installation of Samsung Knox and Samsung SDS EMM in on-premise servers.
- Consultation sessions on solution architecture needs, including adherence with NSA Mobility Access Capability Package (MACP) and interoperability with other CSfC components.
- Device provisioning with Samsung Knox, Samsung SDS EMM, and government mission applications (if required).

TACTICAL DEVICE SUPPORT

Using our Knox customization architecture, easily interface your Samsung Knox Mission device with tactical radios, sensors, and beacons that use applications such as tactical awareness applications deployed military and public safety agencies.
