HPC Managed Services

Cost-effectively expand or outsource your computing, storage and/or network infrastructure

Samsung HPC managed services allow IT departments to focus on what they do best - managing applications, services and data, not running and maintaining hardware and data center infrastructure. We pride ourselves on creating a cost-effective, high core count, high performance-based HPC environment that will provide a very competitive ROI.

WE LET YOU FOCUS ON WHAT YOU DO BEST. WE WILL TAKE CARE OF THE REST!

TCO Optimization

Samsung's one-stop solution consists of competitive pricing as well as Samsung's partnerships with OEM vendors which ultimately enables a very cost-effective solution.

Scalability

The perfect combination of services provides a seamless progression of scalability with our Colocation team and Infrastructure team to support our customers in all verticals inside the rack and beyond.
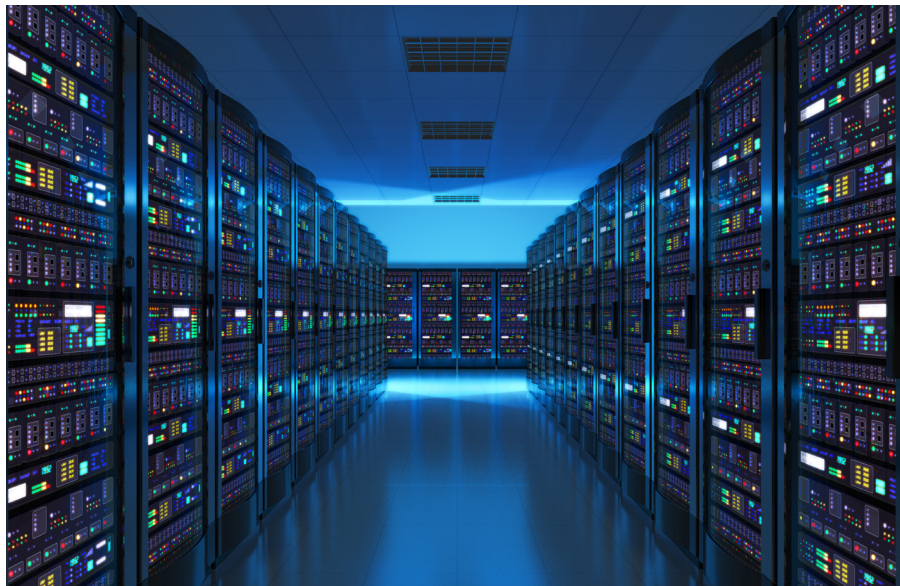

Fault Tolerant Operation

Innovative monitoring solutions and 24x7 manned network operation centers protect and monitor our customers' equipment to ensure optimal performance at all times.

SAMSUNG SDS AMERICA **SAMSUNG**

For Enterprises - expand and grow!

Our industry agnostic managed services solution can help organizations in varying verticals exponentially grow based on business demand. We can work seamlessly with your IT and infrastructure teams to deliver world-class solutions.

For Manufacturers - deliver greater value

Benefit from large core counts and high frequency CPU's that will shorten time to solutions, allowing for customers to drastically increase their HPC cluster throughput. Our services have the depth and breadth to refresh and revamp your HPC strategy.

ABOUT SAMSUNG SDS AMERICA, INC.

Samsung SDS America (SDSA) is the U.S. subsidiary of Samsung SDS, a $8B global software solutions and IT services company. SDSA helps companies optimize their productivity, make smarter business decisions, and improve their competitive positions in a hyper-connected economy using our enterprise software solutions for mobility, security and advanced analytics.
