

Personalized Workstation for Mobile Workspaces

A flexible and convenient workstation

An end-to-end solution for the smart workplace, Samsung SDS America provides a physical desk workstation and reservation system. This workstation is auto-height adjustable, comes with high quality office chairs, digital signage, room booking software, and virtual desk infrastructure.

Maximizing Workspace Optimization

The comprehensive and unified data-driven statistic data will provide insight into current workspace optimization. Based on the statistic data, workspace managers can reorganize office layouts to meet employee usage patterns.

Personalization Based on Preference Data

Our workstation provides a capability to automatically adjust the height based on user preference setting data. This feature gives a healthy work environment to maximize work performance.

Convenient and Flexible

Our workstation booking system allows the user to book a workstation from anywhere and at anytime through Andoid and iOS smartphone web browser applications.

No Boundary or Workspace

Dex and VDI solutions deliver maximum security with a freedom of workspace. Employees can access the corporate system with their smartphone without using a laptop.

Automatic Height Adjustable Workstation

The automatic height adjustable workstation has a digital button to adjust the height inch by inch, including a memory capability to store up to 4 workstation heights.

DeX and VDI

DeX and VDI eliminate the need for carrying around a PC and allow users to work from any workstation by simply using their mobile device. Paired with VDI, users are able to access all intranet systems as they would on their PC.

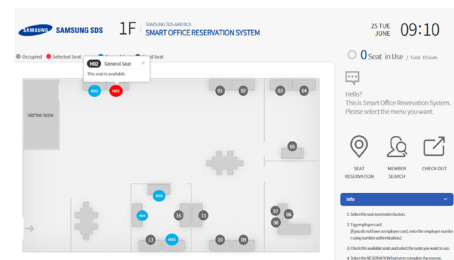

Digital Workstation Panel

The digital workstation panel provides the ability to easily recognize the current occupancy status by various colors, displaying user information, and direct reservation at the workstation by scanning your RFID card.

Workstation Reservation Software

A user-friendly web-based workstation reservation application provides the features of booking or canceling workstation reservations and discovering colleague locations. Also, the application delivers in-depth data-driven statistics for analyzing desk sharing patterns.

ABOUT SAMSUNG SDS AMERICA, INC.

Samsung SDS America (SDSA) is the U.S. subsidiary of Samsung SDS, a \$9B global software solutions and IT services company. SDSA helps companies optimize their productivity, make smarter business decisions, and improve their competitive positions in a hyper-connected economy using our enterprise software solutions for mobility, security and advanced analytics.
