SAMSUNG SDS AMERICA
Mobility Solutions for Government

Empower your mission leaders with
secure mobile platforms

Government employees and military operators need access to various applications from any location, whether forward deployed or for sensitive communications for key leadership. Secure your mobile endpoints to meet mission requirements and Government security standards with Samsung SDS solutions that protect sensitive data while making device and app management simple.

SAMSUNG SDS EMM

Proven Security for Classified Mobile Communication

Samsung SDS Enterprise Mobility Management (EMM) for on premise is a government-grade EMM solution built for off-line and secure mobile deployments and validated for the highest level of security. Secure agencies rely on mobile devices to exchange classified data and mission-critical voice calls. Samsung SDS EMM provides control access and keeps sensitive data secure using an independently-verified solution.

Endpoint Management

- Private Network Device Management
- Deployed as an on-premise solution
- Extensive support for Samsung Knox

Security Accreditations

- STIG
- NIAP Common Criteria MDM protection profile
- NSA Commercial Solutions for Classified

SAMSUNG SDS SECURE SETTINGS
Secure deployed and user devices with agility

Secure Settings enables simple and secure device management for off line deployed mobile devices. Give deployed operators and their supporting resources the ability to securely manage devices with the agility to meet mission objectives.

Offline Management

o   Local on-device management

o   One-click STIG settings

o   Policy file configuration by administrator

o   Tactical settings for S20 Tactical Edition

MISSION SUPPORT DESK
Launch your Tactical Edition deployment with ease

Samsung SDS Mission Support Desk provides tailored technical support for Samsung Knox Tactical Edition, Samsung SDS EMM, and Samsung Secure Settings customers and integrators. The Mission Support Desk leverages our expertise in deploying mobile security solutions in offline and tactical environments. All Tactical Edition customers can use support.

Tactical Edition Support

o   Tier II "help desk to help desk" support

o   Email support desk

o   Troubleshooting for tactical use cases

Support coverage for deployment

o   License activation

o   License Key upload

o   Server environment settings

o   Security and device policy configurations
