

Automotive

Data-driven collaboration between procurement and engineering/production/suppliers from design to mass production

Challenges

Cost reduction for the new product development

Managing cost volatility risk across extended product lifecycles

Emergence of new enabling technologies

Our Solutions

Cost optimization through stage-by-stage simulation & analysis

Procurement Automation through AI-based unit price trend analyzer

Strategic discovery & elevation of suppliers to adopt new technologies

R&D time & cost ↓

Cost uncertainty ↓

Strategic supplier relationship ↑
