

Extract map information and request purchase by utilizing AICR/RPA

Through AICR, the material list can be created by recognizing symbols/characters on the 2D map.
Through Brity RPA, the created material list can be automatically uploaded onto the ERP system and the request form for purchasing materials will be automatically issued.

As-Is

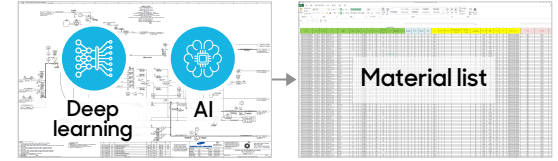

Recognize symbols/characters on the map with naked eyes of the designer

Issue request form for purchasing materials

To-Be

Recognize symbols/characters on the map based on AICR

Automatically issue request form for purchasing materials based on RPA

RPA

Designer

RPA

Upload the material list on the system

Review the material list

Issue request form for purchasing materials
